

TAMAX-LOG-2026 — Logistics & Fleet Profile

TAMAX VENTURES LTD. — LOGISTICS PROFILE

- **Company:** Tamax Ventures Ltd. (Kansarawdo Mampong Road, Yankey Junction, Takoradi, Ghana)
- **Division:** Tamax Heavy Haulage & Logistics
- **Contact:** logistics@tamaxventures.com | www.tamaxventures.com

1. Logistics Overview

At **Tamax Ventures Ltd.**, we understand that high-quality industrial commodities are only valuable if they arrive on time and intact. Our dedicated Logistics Division is the engine that drives our supply chain, providing secure, scalable, and highly efficient freight solutions across Ghana's industrial corridors.

Based strategically in Takoradi—home to one of West Africa's most vital commercial ports—we possess the agility to move bulk cargo from ship-to-site with unmatched speed.

2. Fleet Capabilities & Assets

Our modern, meticulously maintained fleet is engineered to handle the harsh demands of industrial bulk transport.

The Tamax Fleet

- **Heavy-Duty Flatbed Trailers:** Ideal for transporting palletized goods, jumbo bags (FIBCs), and standard 25kg/50kg bagged materials like cement and lime.
- **High-Sided Trailers:** Designed for secure transport of loose cargo and mixed industrial supplies.
- **Bulk Powder Tankers** (*Available for contract*): Specialized enclosed transport for dry, moisture-sensitive powders like quicklime.

Maintenance & Reliability

We operate a strict, preventative maintenance program. Every truck undergoes rigorous pre-trip inspections to ensure mechanical reliability, minimizing the risk of en-route breakdowns and guaranteeing delivery timelines.

3. Core Logistics Services

Service	Description
Port Evacuation	Rapid container clearing, unstuffing, and direct bulk dispatch from Takoradi Port.
Just-In-Time (JIT) Delivery	Synchronized delivery schedules aligned with clients' production cycles to reduce on-site storage bottlenecks.
Last-Mile Distribution	Navigating complex inland routes to deliver materials directly to remote mining sites and construction zones.
Buffer Warehousing	Secure, weather-tight storage at our Takoradi hub to absorb port delays and ensure continuous supply.

4. Safety & Fleet Tracking

[!IMPORTANT] **Safety First, Always**

- **GPS Telematics:** *Our entire fleet is equipped with real-time GPS tracking, allowing our dispatch center to monitor vehicle speed, route adherence, and precise estimated times of arrival (ETAs).*
- **Driver Fatigue Management:** *Strict adherence to driving hour limits and mandatory rest periods.*
- **Load Security:** *Rigorous load-binding and tarping protocols to protect materials from weather damage and prevent in-transit spillage.*

5. The Takoradi Advantage

Our headquarters' proximity to the **Takoradi Port** grants us a significant tactical advantage. We bypass the extreme congestion often associated with other regional hubs, resulting in:

- Faster turnaround times for imported raw materials.
- Reduced demurrage and storage penalties.
- Lower overall landed costs for our partners.
